My VPCs Console

console.huaweicloud.com/vpc/?region=ap-southeast-3&locale=en-us/vpc/vpcs/createVpc

You are using an unsupported command line flag: --no-sandbox. Stability and security will suffer.

CREATE VPC

Basic Configuration

Region:

Virtual Private Cloud

Name:

IPv4 CIDR Block:

Subnet 1

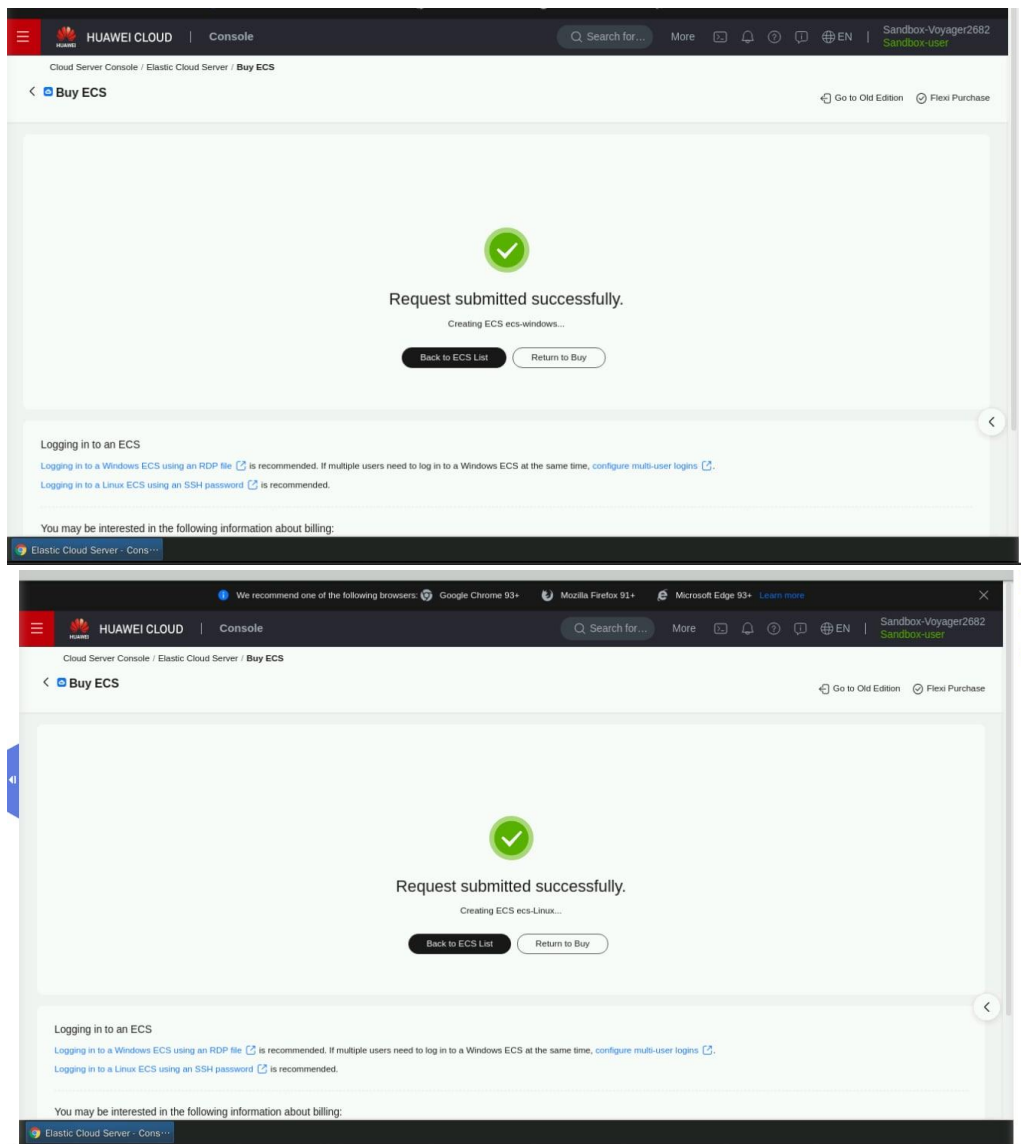

Name:

IPv4 CIDR Block:

Retain the default settings for other parameters.

Note: Replace the VPC name vpc-WP and the default subnet name subnet-WP with the account name assigned by the system, for example, vpc-SandBox-voyager002 and subnet-SandBox-voyager002.

Task 11:

Task 12:

The screenshot displays the Huawei Cloud Elastic Cloud Server (ECS) console. The interface includes a top navigation bar with the Huawei Cloud logo, a search bar, and a user profile. A left sidebar contains navigation links for Cloud Server Console, Overview, Events, Scheduled O&M, Troubleshooting, Cloud Bastion Host, Servers and Images, Elastic Cloud Server, ECS Group, Huawei Cloud Flexus, Dedicated Host, Bare Metal Server, Image Management Service, Network and Security, and Security Groups. The main content area is titled 'Elastic Cloud Server' and features a notification about the password reset plug-in. Below this, a search bar for 'My ECSs' is shown. A table lists the ECS instances, with columns for NameID, Mon..., S..., Status, AZ, Specifications/Image, OS, I..., and Operation. Two instances are visible: 'ecs-linux' (Creating) and 'ecs-windows' (Running). The bottom of the table shows 'Total Records: 2' and 'Selected: 0'.
